DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 30, 36 - 39, drawn to identifying content via comparison to a list, classified in class 713, subclass 176.
- II. Claims 31 - 35, drawn to a specific method of generating digital signatures, classified in class 713, subclass 180.

Inventions I and II are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are different functions for identifying content using a list and for generating a specific digital signature. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their

1 recognized divergent subject matter, restriction for examination purposes as indicated is
2 proper.
